

ENVIRONMENTAL POLICY

"As Biofarma Pharmaceuticals Industry and Trade Inc., we have adopted the general objective of complying with environmental legislation, controlling environmental impacts, reducing these impacts, and continuously improving our environmental performance to leave a livable environment and usable natural resources for future generations.

For a sustainable environment, we prioritize identifying pollution at its source and minimizing it, promoting measures for natural resource conservation in all our operations to prevent climate change and global warming, and supporting efforts to reduce, reuse, and recycle waste.

To protect the environment, we commit to use appropriate technology continuously, raising awareness among our employees about environmental protection through training activities, ensuring compliance with laws and regulations, preventing pollution by considering the needs and expectations of relevant parties, continuously improving and preserving our ISO 14001 environmental performance according to changes in regulations."
