

QUALITY POLICY

Since its establishment in 1945, Biofarma İlaç San. ve Tic. A.Ş. has been serving the public health by manufacturing products in various pharmaceutical forms. Our understanding of quality is as follows:

We fully comply with national and international quality standards, current GMP requirements, and all relevant legal obligations in our modern production facilities for the local and international pharmaceutical industry, utilizing environmentally friendly technologies. With our quality policy aimed at high performance, superior quality, and complete customer satisfaction, we always provide services to the well-being of human health with confidence.

In accordance with our customer-oriented process approach and the principle of continuous improvement, we continue to enhance our practices within the framework of ISO 9001 Quality Management System, with an environmentally conscious and human health-oriented approach in ISO 14001 Environmental Management and ISO 45001 Occupational Health and Safety Management systems, while maintaining our operations by fulfilling all legal permissions and requirements.

We provide continuous and planned trainings to all our employees to ensure the adoption, understanding, and relevance of our quality policy, concepts, and principles.

We establish a sustainable and reliable quality system, based on the approach of continuously evolving Quality Management System, which is in line with the intended use and regulatory requirements of our products. This process is dynamic and ongoing, and with the support of top management, we ensure the active participation of all employees and suppliers. We commit to continuously improve this system and maintain its dynamic and continuous nature.
